CP 200: HISTORY OF CITY PLANNING
(Tu/Th 11-12:30, 108 Wurster; Discussion Sections: TBA)

Introduction

This course covers the evolution of the ideals, profession, and practice of city planning from the 19th to the 21st Century. It explores the changing relationships between city and regional planning and broader historical trends in the light of changing ideas about who cities are for; about urban problem-solving; about how urban settlements should be organized and re-organized; about the relationships between the built and natural environments; and about the effects of urban form and organization on society. The focus is substantially but not entirely upon the American experience.

Requirements

1. Attendance and participation in discussion: 10%
2. Mid-term exam: 15%
3. Research Paper: History of a Planning Idea, Program, or Movement: 50%
4. Final exam: 25%

Assignment One and Only -- Due Tuesday, Nov. 27, 2007

We ask that you write a 20-25 page paper tracing the intellectual and practical history of a modern (20th century) planning object, idea, movement, program, or local planning process. If you want to focus on an earlier era, please consult Michael Teitz, Jim Buckley, or Greg Newmark. Here are some possible topic choices, though finding your own interest is really the best. Check with us if you are unsure.

- The legacy of the White City
- The City Beautiful Movement
- The rise and controversy over zoning
- Exclusionary zoning
- The Chicago School and the birth of community development
- Public Housing
- FHA and other homeownership programs
- Urban renewal and its aftermath
- The Clean Air/Clean Water Acts
- The National Environmental Policy Act
- Model Cities and/or Empowerment Zone planning
- Public Housing and/or Hope VI
- Neo-traditional town planning/The New Urbanism
- The Interstate Highway Act
- ISTEA/TEA-21
- Levittown
- Planning for master-planned communities
- Planning for the Olympics/worlds fairs
- Growth control/Growth management
- Urban growth boundaries
- RPAA or RPNY&E
- Regional/metropolitan planning
- Advocacy planning/equity planning
- Downtown redevelopment strategies
- Sustainability planning
- Company towns
- TVA

Regardless of your topic, your paper should touch on the following issues:

- Precursors: *Where did this idea or movement come from?*
- Political, social, or economic generating forces: *Why did this form or style of planning develop or evolve?*
- Intellectual basis: *Which intellectual positions or arguments regarding the nature of humankind in the physical, social, or natural environment, lie at the heart of this area?*

- Key policy or programmatic approaches: *How was your chosen type of planning to be implemented?*
- Notable places, dates, people, and writings.
- Evolution: *How has the purpose, role, mode, or style of this type of planning changed since World War II, and why?*
- Successes, failures, conflicts: *How well did things work out, and why?*
- Lessons: *What can we today learn from this experience or movement?*

You may organize your paper chronologically or thematically, taking a local, national, or even international viewpoint. At a minimum, your paper should have an introduction section introducing your main theme; a body or argument section, and a summary and conclusions section. Please use section headings, and include all citations at the end of your paper. **Good luck!**
